Allowable Subject Matter

The following is an examiner's statement of reasons for allowance: in light of the remarks, and the amendments filed March 20, 2008, applicant's claimed invention "as a whole" has been defined to distinguish over the teachings of the prior art. More specifically, the prior art cited by the examiner fails to teach or suggest, nor would it have been obvious to one of ordinary skill in the art to modify the prior art cited by the examiner to expressly disclose, applicant's claimed features of: "a second clock operable to be selectively activated by the general computing subsystem to the shared memory module to permit use of the shared memory module by the modem computing subsystem" together with "a clock and power control unit disposed in the modem computing subsystem and operable to gate clocking within the modem computing subsystem and to the shared memory module when modem functionality is not enabled", as recited in independent claim 1, and similarly recited in independent claim 7.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
